**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

Claims 1-15 are pending.

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12, drawn to a compound of formula 1, composition and method for controlling an invertebrate pest when V and Y = N, W =C or N, classified in class 544, subclass 296+

Group II, claim(s) 1-12, drawn to a compound of formula 1, composition and method for controlling an invertebrate pest when one of V and Y = N, W =C or N, classified in class 546, subclass 268.1, 268.4, 268.7.

Group III, claim(s) 1-12, drawn to a compound of formula 1, composition and method for controlling an invertebrate pest when V, Y and W =C, classified in class 548 and subclass 100+.

Group IV, claim 13, drawn to a spray composition containing a propellant of formula 1, classified in class 424, subclass 1.13.

Art Unit: 1616

Group V, claim(s) 14 and 15, drawn to a composition and device of the compounds of formula I, classified in class 424, subclass 410, 412+.

2. The inventions listed as Groups I to V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

3. Inventions of group I is different from the inventions of groups II-V.

Subject matter of each group does not have a technical relationship involving one or more identical or corresponding special technical features. Group one belongs to compounds having pyrimidine group, group II contains pyridines, group III contains pyrazoles each of them are different class of compounds and do not correspond to the one or more identical or corresponding features. Similarly group IV belongs to a spray composition and group V belongs to claims drawn to a device and bait composition containing food additives. Therefore the subject matter as described in the above groups should be considered as different inventions.

4. A telephone call was made to Attorney Linda D. Birch request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected

Art Unit: 1616

invention. Applicant is requested to elect a single species from the elected group for examination purposes.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

5. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### **Communication**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sabiha Qazi, Ph.D. whose telephone number is 571-272-0622. The examiner can normally be reached on any business day.

Art Unit: 1616

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann Richter, Ph.D. can be reached on 571-272-0646. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
